

Дидактический материал (карточки по математике) предназначен для отработки навыка счета по теме «Внетабличное умножение» (4 класс). Карточки двусторонние, на обратной стороне написаны ответы к примерам на «лицевой» стороне. Ученик выполняет вычисления и проверяет верность работы. Ежедневная тренировка с использованием данного материала позволяет довести вычислительные навыки школьников до автоматизма. Карточки удобны в использовании: свободно помещаются под обложкой тетради, работа выполняется на полях и не занимает свободную площадь листа.
